

IN THE CLAIMS:

Please cancel claims 5 and 6 without prejudice or disclaimer of the subject matter thereof.

The following is a complete listing of claims in this application.

1. (currently amended) An A chromaticity-corrected LED device comprising:

an LED mounted on a substrate;

transparent resin sealing the LED, the transparent resin including phosphor particles distributed therein for changing a color chromaticity of light emitted from the LED to a desired chromaticity, based upon an expected chromaticity of the light emitted from the LED and sealing the LED; and

a dye dyeing at least a portion of the sealing resin for correcting the color chromaticity of the light emitted from the LED, and based upon an actual chromaticity of the light emitted from the LED.

2. (currently amended) The device according to claim 1 wherein the dye has a color chromaticity for correcting the color chromaticity of the light from the LED to acquiring a desired color of light.

3. (currently amended) The device according to claim 1 wherein the dye has a complementary color to the color chromaticity of the light emitted from the LED for a desired color of light.

4. (original) The device according to claim 1 wherein at least a surface of the sealing resin is dyed by the dye.

Claims 5-6 (canceled).
